

# Demoria Research — Data Sourcing

DEMORIA RESEARCH · DHI 2026 · v2.0

## Data Sourcing — NSO Overrides and DRE

*Where every overridden cell in the Demographic Health Index actually comes from.*

### Overview

The Demographic Health Index (DHI) is built on the United Nations World Population Prospects 2024 (WPP) baseline. The great majority of cells in the panel — across every year, country and indicator — come directly from WPP and are stamped WPP on the Data tab.

Where the published WPP figure has been overridden, the overriding value is drawn from the country's own national statistical office. 119 countries and territories have at least one such override:

- 118 are sourced directly from the named national statistical office (NSO), as listed in the table below. Each one of these offices is the authoritative producer of vital statistics for its jurisdiction.
- 1 (Ukraine) uses a Demoria Research Estimation (DRE) — a transparent, Demoria-internal reconstruction for 2022 onward, built on the State Statistics Service of Ukraine, the Ptoukha Institute of Demography and Social Studies (NASU), and UNHCR refugee data. The DRE methodology is documented in its own section below.

*Three countries originally reviewed for an override (United Arab Emirates, Bosnia & Herzegovina, Suriname) showed no material divergence from WPP and were retained on WPP — they do not appear in the table.*

### NSO sources by country

The 118 countries and territories whose overridden cells are sourced from the named national statistical office. Each office is the authoritative producer of population and vital statistics for its jurisdiction; figures used by the DHI trace back to that office's published series.

## Demoria Research Estimation (DRE) — Ukraine

### Why a DRE was needed

Russia’s full-scale invasion of Ukraine in February 2022 displaced an estimated six to eight million Ukrainians, disrupted civil registration in occupied and front-line oblasts, and made the standard demographic series — both UN WPP 2024 and the published Derzhstat figures — unusable as a continuous panel from 2022 onward. WPP’s 2024 revision relies heavily on modelled assumptions for the wartime years; Derzhstat publishes partial vital statistics but cannot cover the diaspora or occupied territories on a consistent basis.

The DRE is a transparent reconstruction of the 2022–2025 Ukrainian demographic record for the indicators the DHI requires. It is documented and reproducible from the workbook `Ukraine_DHI_raw_data_with_Override.xlsx` (Override tab), kept in the project repository alongside the scoring pipeline.

### Inputs combined

- State Statistics Service of Ukraine (Derzhstat / Ukrstat) — pre-war series and continuing partial vital registration in government-controlled areas.
- UNHCR refugee outflow data — for population adjustments and the net-migration rate.
- Independent Ukrainian demographers (Ptoukha Institute of Demography and Social Studies, NASU; including work by E. Libanova and O. Pozniak) — fertility and mortality estimates during wartime.
- UN WPP 2024 Low / Median / High variants — used as sanity bounds where direct data was unavailable.

### Indicators reconstructed

The DRE replaces WPP values for the following indicator cells; every figure traces back to the source workbook, and every cell is stamped DRE on the Data tab.

| Indicator                              | Source                                         | Years               |
|----------------------------------------|------------------------------------------------|---------------------|
| Total fertility rate (TFR)             | <i>Override workbook (Override tab)</i>        | 2022, 2025          |
| Live births                            | <i>Override workbook</i>                       | 2022–2025           |
| Deaths                                 | <i>Override workbook</i>                       | 2022–2025           |
| Total mid-year population              | <i>Override workbook (refugee-adjusted)</i>    | 2022–2025           |
| Crude birth rate (CBR)                 | <i>Override workbook</i>                       | 2022–2025           |
| Crude death rate (CDR)                 | <i>Override workbook</i>                       | 2022–2025           |
| Old-age dependency ratio (OADR)        | <i>Override workbook</i>                       | 2022–2025           |
| Worker replacement ratio (WRR)         | <i>Override workbook</i>                       | 2022–2025           |
| Labour-force participation rate (LFPR) | <i>Override workbook</i>                       | 2022–2025           |
| Working-age share (15–64)              | <i>Override workbook</i>                       | 2022–2025           |
| Under-20 share                         | <i>Override workbook</i>                       | 2022–2025           |
| Median age                             | <i>Override workbook</i>                       | 2022–2025           |
| Net migration rate                     | <i>Override workbook (UNHCR refugee flows)</i> | 2022–2025           |
| Full age pyramid (5-yr bands x sex)    | <i>Override workbook</i>                       | 2022–2025           |
| 5-year natural change                  | <i>Recomputed from CBR – CDR</i>               | 2022–2025 (derived) |

### Methodology notes

- Overrides are applied at the indicator-cell level — a country may use overridden TFR for, say, 2018–2024 and WPP for projections to 2100. The override is targeted, not wholesale.
- Every cell stamped NSO or DRE is visible as such on the Data tab; every other cell is stamped WPP. Provenance is preserved per cell.

- Where a downstream indicator depends on overridden inputs (e.g. 5-year natural change from CBR – CDR), it is recomputed from the override values and inherits the NSO / DRE stamp.
- Every NSO entry in the table above corresponds to the authoritative producer of vital statistics for that jurisdiction; figures used by the DHI trace back to that office’s published series.
- The Ukraine DRE workbook (Override tab) is preserved alongside the scoring pipeline so any cell can be audited back to its source row.
